

MECHATRONICS/ELEC-MECH ENGINEERS

Start Date: ASAP

Contact: William Oldnall

Email: william@caudwellmarine.com

We are looking for a mechatronics/electro-mechanical engineers to assist with the development of the control system for an exciting new marine propulsion product.

The product, a revolutionary recreational marine drive, is at an advanced stage of development. Applicants will be required to sign a non disclosure agreement.

Key Skills:

- Good knowledge of internal combustion engines
- Solid grounding in electronics
- Project management skills
- Business communication skills
- Sourcing / specification of bought-out components
- Specification and set up functional testing for prototype components and systems
- Data acquisition and analysis
- Technology research

Candidates must be highly motivated individuals with exceptional work ethic and a commitment to quality. The ability to work as part of team is equally important to initiative and pro-activity.

Few opportunities exist in South Africa to be part of a dynamic team bringing new technology to global markets. If you have an appetite for complex engineering challenges, hard work and are success driven, we would like to talk to you. Please send a concise CV and full contact details to william@caudwellmarine.com.

Caudwell Marine reserves the right to invite candidates for interviews based on its own discretion and profiling.
