Caudwell Marine (www.caudwellmarine.com) is a Cape Town based company (at Cape Town International Airport) in the process of developing a unique drive for high performance boats. The drive consists of multiple, complex systems and requires extensive testing and development to be ready for sale on the global market.

A Test Technician is required to carry out development testing on various test rigs. These include engine dynamometers and water test tanks. The successful candidate will be a motivated, hard working individual with a solid technical background.

Responsibilities:

- Aid in setup and instrumentation of test rigs.
- Carry out tests.
- Capture test data to aid in further development.
- Compile reports that present test data in a professional manner.

Education and skills:

- Technical qualification required.
- Excellent written and verbal communication skills are required.
- A high level of computer literacy is required. Specifically a high level of proficiency with MS Office Excel is important.
- A good knowledge of petrol and diesel engines is desirable.
- Experience with LabView and Pro Engineer an asset.
